MultiConnect

MULTICONNECT FOR HFT

Set up for high frequency trading in 24 hours

RESULTS OF SPEED MEASUREMENT

2

VIKING

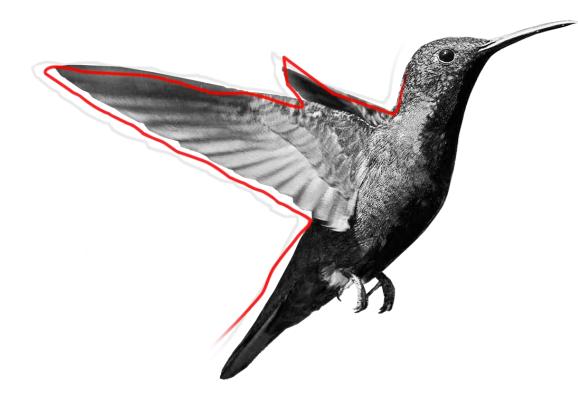

The reasons of reducing trading speed

Robot	Trading terminal	Internet	Broker's server	Exchange
0 ms	0 ms	0 ms	0 ms	0 ms
3 1	3 1	3	3 1	3
Up to 1.5	From 1 to 3 ms	0.5 ms	From 0.1 to 1 ms	0.7 ms
Windows operating system	Designed for manual trading	A large number of routers*	Processing possibilities at peak load	The communication protocol

*Max 100mb/s

3

TOTAL DELAY FROM 3 ms AND ABOVE

WHILE DEVELOPING THE NEW VERSION OF MULTICONNECT-ARBITRAGE-ROBOT WE TAKE INTO CONSIDER:

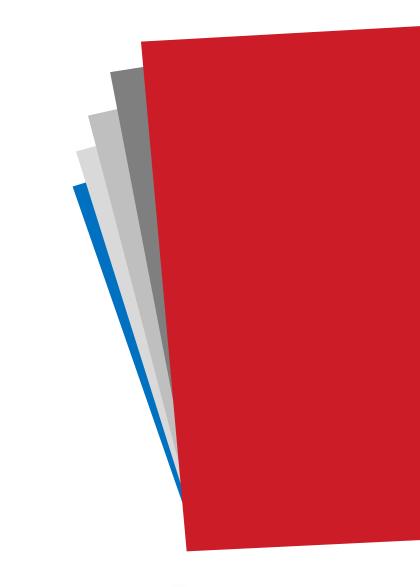

Tre

2

4

5

- **Trade performance:** adding orders, receive a response from the Exchange, data processing by robot
- **Universality and adaptability of the robot:** new markets, financial instruments, different algorithms
- B Development speed of new strategies and the possibility of significant changes in the source code
 - Integration with third-party connection libraries
 - Increase software reliability: the critical part is allocated in separate process

Ways for increasing speed in the new concept of the Robot

Robot	Trading terminal	Internet	Broker's server	Exchange
0 ms	o ms	o ms	0 ms	0 ms
3 1	3	3 1	3	3
0.005 ms	0	0	0	0.7 ms
Configuring the Linux OS for Low Latency	Special configuration Mellanox NIC	M1 Colocation router 10 GB/s	Own server	Used communication protocol: FAST / FIX,

SERVER SIDE OF THE ROBOT

- Trading algorithm, optimized for the Linux OS
- «MultiConnect» Library connections to the exchanges with single interface for a variety of trading platforms
- Different types of connections for receiving Market Data and sending transaction
- Orders moving is realized for the connections which have this ability

CLIENT SIDE OF THE ROBOT

The graphical user interface (GUI)

رَحٌ Trading algorithm configuration

Monitoring of trading algorithm progress

⊿	6	Ļ

Testing of algorithm and selection of parameters based on historical data

ARBITRATION ALGORITHM AND MULTICONNECT LIBRARY

1. Classic arbitration algorithm for implementation of any trading strategy

2. Small risks

3. High profitability

The "Viking" financial company (licensor) provides for rent the servers for trade installed in a zone of collocation of the Moscow exchange on M1

FACTORS THAT AFFECT TRADER'S INCOME

Trader's income is connected with exchange turnover and the sum of the commission. Percent of successful transactions is grows with fast software.

- ► 1. EXCHANGE COMMISSION 33% > 22%
 - • 2. BROKER COMMISSION **33%** > **22%**
- ► 3. NET INCOME OF THE TRADER **33,3% > 66,6%**
- ▶ 4. NUMBER OF SUCCESSFUL TRANSACTIONS **40%** > **80%**
- ► 5. TRADER'S INCOME **100%**

CLIENTS TRADING OUR SOFTWARE THROUGH THE "BEST EFFORTS BANK",

rapidly raised the rating of the bank in terms of turnover in the currency section of the Moscow Stock Exchange 23 place– April, 2015, 16 place– September, 2015, 6 place– December, 2015, 8 place– February, 2016.

PARAMETERS OF LICENSES:

1	Data Center:	4	Data transfer speed:
	DPC Amazon DPC dataspace		1 GB/s 10 GB/s
2	Software installation:	5	Exchange connection protocol:
	Own server Rent server		FAST / FIX, TWIME Binary
3	Marketplace:	6	Consultation:
	Currency market Futures market		Consultation on the required server hardware configuration and tuning
\square	Stock market Crypto market

WORK STAGES:

Accept configuration

2 The signing of the contract of the Software lease

3 The signing of the NDA agreement

Commissioning

COMPETITION AND PRIVACY ISSUES

MULTICONNECT-ARBITRAGE-ROBOT

Trade strategy, ready to work

LICENSE

We provide our Robots on the terms of the license

STRATEGY

Each of our clients forms unique trading strategy

ADAPTIBILITY

Ability to create "own" algorithm and customize by GUI and Pyton"

CONFIGURATION

Exclusive additions to the Robot from the developer on request

PRIVACY

We sign the NDA agreement

SECURITY

Connection settings are stored on a server running under the protection of exchange's Firewall

UNIQUENESS

We sell hi-tech developments. We aren't afraid to share them as the trading strategy of each trader is unique

WHY WE SELL?

We consider a great demand and requirement to buy the "ready-to-trade" Robot and a complete set of services. And still our main specialization – high-speed connections

"Viking" financial company

Dennis Klochkov

() +7-925-199-88-88

☑ klochkov@fkviking.com

Order detailed description of arbitration algorithm by e-mail: klochkov@fkviking.com In 2019, we planning reduce round trip to 500 nanosec
