

Information about SNOWBIKE LLC.

22.04.2020

Moscow

Specialization: LLC "SNOWBIKE" is a scientific production company, specializes in small-size tracked vehicles on electric traction. The company's products allow a person to move on difficult surfaces such as snow, gravel, swamp, sand, as well as to transport useful goods in difficult conditions. The company produces devices to order, as well as provides services to develop new products for commercial organizations. Products have advantages over gasoline technology such as: low weight, quiet operation and small size.

Key product: The company's main product at the moment is an electric snow scooter Sniejik. It is an electric single-track snowmobile of lightweight type. The device is folded into a passenger car, it is charged from a household network 220V. Several versions of the snowmobile have been developed for different tasks of customers (including high cross-country ability for extreme conditions). At the moment it is produced piece by piece under the order. Reference to models <http://sniejik.com/>

2 kW Electric Snow Scooter
